# Diamyd Medical

### An important summer awaits

#### Q3 – in line with our expectations

Diamyd's Q3 report was in line with our expectations and focus remains on patient recruitment to the DIAGNODE-3 study. The CEO stated in the report that nearly all clinics are now active and that the pace of screening has accelerated recently. The report provided no larger surprises from a financial viewpoint. The operating result landed at SEK-42.3m (-23.6m), while operating cash flow was SEK-36.8m (-24.0m).

#### Stable financial position

After the recently completed rights issue, Diamyd had just over SEK162m in cash and cash equivalents at the end of May. We still believe the company has sufficient cash to finance itself until mid-2026, should the outstanding warrants be subscribed to (around SEK125m). The TO3 programme, which is the next in line, has a subscription price of SEK11 per share for 2–30 September 2024. As interim data is anticipated before September, we expect the outcome of this will be crucial to whether TO3 is fully subscribed. With a positive outcome, it is especially likely the price would surpass SEK 11 and that Diamyd would receive the cash, while a negative outcome would likely mean the opposite.

#### Favourable conditions for upswing ahead of data

We make no estimate changes, while we adjust our fair value to SEK19–23 (20–22) following the Q3 report. We believe the bar is low for positive interim data, but we have not modelled any specific risk adjustments for this. A positive outcome would naturally increase the LoA for the project from the current 50%. The Diamyd share tends to be volatile before and in response to important news and we see favourable conditions for an upswing in the share price before the interim data (expected in the summer; we anticipate early August).

## Investment case

Diamyd is a late-stage biotech company. Its leading project, diabetes vaccine Diamyd, is currently undergoing a ph III study in type 1 diabetes. In a larger meta-study (patient base of 600+), Diamyd has shown a statistically significant and clinically relevant therapeutic effect (preservation of beta cell function) in a specific sub-group of newly diagnosed type 1 diabetes patients – those with the DR3-DQ2 gene. This gene is particularly common and constitutes 40–50% of all type 1 diabetes cases. It is this niche patient population that is included in the ph III study and given potential market approval, this will be the commercial target group for the Diamyd vaccine.

While we see high risk in the project, we believe the Diamyd vaccine is a unique drug candidate that could, if launched, prove a blockbuster with annual sales exceeding USD 1bn globally.

### Company profile

Diamyd Medical works with drug development, diabetes being its main focus area. Currently, Diamyd has two drug projects in clinical development: 1) diabetes vaccine Diamyd, which aims to interrupt the body's attack on its own insulin production, and 2) Remygen, a GABA-based oral medicine intended to restore the body's own insulin production.

### Valuation

We use a risk-adjusted sum-of-the-parts (SOTP) valuation for Diamyd. Our fair value is SEK 19–23.

# Disclosures and disclaimers

## Carnegie Investment Bank AB

Carnegie Investment Bank AB (publ.) is a leading investment bank with a Nordic focus. The Carnegie group of companies, together "Carnegie", generates added value for institutions, companies and private clients in the areas of trade in securities, investment banking and private banking. Carnegie has approximately 600 employees, located in offices in six countries.

## Penser by Carnegie

In November 2023, Carnegie acquired the commissioned research business from Erik Penser Bank AB. This included the business under which Erik Penser Bank AB e.g. has published its Penser Access and Penser Future research services. This business continues to be operated by Carnegie under the trademark Penser by Carnegie.

## Valuation, methodology, and assumptions

### Penser Access by Carnegie

Commissioned research reports under Penser Access by Carnegie include the analyst's assessment of a fair value range on the date the research was published based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E ratio and EV/EBIT multiples, relative to industry peers to obtain a target price. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing. For more information on valuation models, click [here](#)

### Penser Future by Carnegie

Commissioned research reports under Penser Future by Carnegie do not contain a fair value range. Instead, the analyst assesses the company and sheds light on the strengths and weaknesses observed based on four areas. The four areas are assessed based on the following criteria: Potential, Risk, Financial Position and History & Merits. The results are presented on a scale of 1-5 where 5 represents the highest rating in each area. For example, a rating of 5 for Potential means that we see strong potential in the business while a rating of 5 for Risk means that we assess the risk as high.

## Frequency of update

Penser by Carnegie's research analysis consists of case-based analyses, which implies that the frequency of the analytical report may vary over time. Unless otherwise expressly stated in the report, the analysis will be updated quarterly or when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

## Analyst certification

The research analyst or analysts responsible for the content of this commissioned research report certify that, notwithstanding the existence of any potential conflicts of interests referred to herein, the views expressed in this commissioned research report accurately reflect the research analyst's personal views about the companies and securities covered. It is further certified that the research analyst has not been, nor is or will be, receiving direct or indirect compensation related to the specific ratings or views contained in this commissioned research report.

## Potential conflicts of interest

Carnegie, or its subsidiaries, may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this report. Any such publicly announced business activity, during the past 12 months, will be referred to in this commissioned research report. A set of rules handling conflicts of interest is implemented in the Carnegie Group. Investment Banking and other business departments in Carnegie are surrounded by information barriers to restrict the flows of sensitive information. Persons outside such barriers may gain access to sensitive information only after having observed applicable procedures. The remuneration of persons involved in preparing this commissioned research report is not tied to investment banking transactions performed by Carnegie or a legal person within the same group.

Confidential and non-public information regarding Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner.

Internal guidelines are implemented in order to ensure the integrity and independence of research analysts. In accordance with the guidelines the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues; contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines and analyst remuneration.

## Other material conflicts of interest

This report was commissioned and sponsored by the issuer (issuer-paid research).

## Distribution restrictions

This commissioned research report does not have regard to the specific investment objectives, financial situation or particular needs of any specific person who may receive it. Investors should seek financial advice regarding the appropriateness of investing in any securities discussed in this commissioned research report and should understand that statements regarding future prospects may not be realized. Past performance is not necessarily a guide to future performance. Carnegie and its subsidiaries accept no liability whatsoever for any direct or consequential loss, including, without limitation, any loss of profits arising from the use of this commissioned research report or its contents. This commissioned research report may not be reproduced, distributed or published by any recipient for any purpose. The document may not be distributed to persons that are citizens of or domiciled in any country in which such distribution is prohibited according to applicable laws or other regulations.

This commissioned research report is distributed in Sweden by Carnegie Investment Bank AB. Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability which is authorised and regulated by the Swedish Financial Supervisory Authority (Finansinspektionen). In Finland this commissioned research report is issued by Carnegie Investment Bank AB, Finland Branch. The Finland branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Finnish Financial Supervisory Authority (Finanssivalvonta). In Norway this commissioned research report is issued by Carnegie AS, a wholly-owned subsidiary of Carnegie Investment Bank AB. Carnegie AS is regulated by the Financial Supervisory Authority of Norway (Finanstilsynet). In Denmark this commissioned research report is issued by Carnegie Investment Bank AB, Denmark Branch. The Denmark branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Danish Financial Supervisory Authority (Finanstilsynet).

This commissioned research report is distributed in the US by Carnegie, Inc., a US-registered broker-dealer and a member of FINRA and SIPC. Carnegie's research analysts located outside of the US are employed by non-US affiliates of Carnegie Inc. ("non-US affiliates") that are not subject to FINRA regulations. Generally, Carnegie research analysts are not registered with or qualified as research analysts with FINRA, and therefore are not subject to FINRA rule 2241 restrictions intended to prevent conflicts of interest by, among other things, prohibiting certain compensation practices, restricting trading by analysts and restricting communications with the companies that are the subject of the research report. Research reports distributed in the U.S. are intended solely for major US institutional investors and US institutional investors as defined under Rule 15a-6 of the Securities Exchange Act of 1934. This commissioned research report is provided for informational purposes only and under no circumstances is it to be used or considered as an offer to sell, or a solicitation of any offer to buy any securities. Reports regarding equity products are prepared by non-US affiliates of and distributed in the United States by Carnegie Inc. under Rule 15a-6(a)(3). When distributed by Carnegie Inc, Carnegie Inc. takes responsibility for the commissioned research report. Any US person who wishes to effect transactions based on this commissioned research report should contact Carnegie Inc. Investors in the US should be aware that investing in non-US securities entails certain risks. The securities of non-US issuers may not be registered with, or be subject to, the current information reporting and audit standards of the US Securities and Exchange Commission.

This commissioned research report has been issued in the UK by Carnegie UK which is the UK Branch of Carnegie Investment Bank AB. Carnegie UK is authorised and regulated by the Financial Conduct Authority (FCA).
